PROJECTS

Training Management System: Engineered a Laravel-based system that systematized training schedules and intern progress tracking, reducing manual work and improving visibility.

Timesheet Module Enhancement: Integrated NetSuite APIs and streamlined Core PHP backend logic to correct data inconsistencies and ensure dependable timesheet synchronization.

Fleet – Expense Upload & Approval System: Implemented automated approval flows and Oracle Financial API integrations to replace slow manual steps and enable real-time, error-free expense handling.

Nemko – Project Management System: Designed RESTful Laravel APIs supporting project creation, updates, assignments, timelines, and reporting, improving end-to-end project visibility and operational efficiency.

BBB – Oracle Commerce Platform: Improved site performance and user experience by building a responsive, user-friendly Oracle Commerce front-end interface.

Oracle Integration Projects (Kalyan Silks & Zimmo): Computerized receipt updates and QR generation using automated API routines, reducing delays and ensuring consistent, accurate processing.

SixOrbit ERP : Enhanced module functionality by extending custom features, refining backend logic, and configuring workflows across key ERP operations.

EDUCATION

B-Tech (Information Technology), KCG College of Technology Aug 2018 – May 2022 | Chennai, India
CGPA : 7.68

CERTIFICATES

Azure AI Fundamentals (Microsoft) - May 2022 | PHP (Udemy.com) - 2022
